

Fenton Road, Warboys – Traffic Calming and Warning Sign Proposal – Jul 19

A Pidley-style Give Way Narrowing is preferred to an actual buildout to allow agricultural vehicles a less angular and thus easier passage through the measure. Being built out, it will also afford those pedestrians - who need to cross into Warboys – a better vision of downhill traffic coming around the 'blind' bend 100 yards before which a 'Pedestrians Crossing 100yards' has been sponsored by Community Roadwatch to inform drivers of the hazard around the blind bend. Remember 80mph is not unusual from the A141 at this location where people have to cross verge to verge (no footway).

The 30 Limit has been moved to allow safer egress from houses and also to allow the narrowing to be located in a 30 zone away from dwellings to reduce (as much as possible) fumes and noise entering homes from any backed-up traffic. So some thought and consideration has been put into this pragmatic proposal.
